

ENVIRONMENTAL BASELINE SURVEY

INARNG LINTON ARMORY

15-ACRE PARCEL LINTON, GREENE COUNTY, INDIANA

Prepared for: INDIANA ARMY NATIONAL GUARD

State Headquarters Environmental Office 2002 S. Holt Road Indianapolis, Indiana 46241

Prepared by: WSP USA Environment & Infrastructure Inc.

41 Hughes Drive Traverse City, Michigan 49696

January 23, 2023

WSP Project Number: 3650220256

EXECUTIVE SUMMARY

This Environmental Baseline Survey (EBS) was prepared by WSP USA Environment & Infrastructure, Inc. (WSP) for the Indiana Army National Guard (INARNG) and the National Guard Bureau (NGB). This EBS was completed for the INARNG Linton Armory, a 15-acre parcel (hereinafter referred to as the "Site") located at 2000 Highway 54 East, Linton, Indiana.

This EBS was performed in compliance with the ARNG Environmental Condition of Property (ECOP) Handbook and guidance from the American Society for Testing and Materials (ASTM) D6008-96: Standard Practice for Conducting Environmental Baseline Surveys to determine or discover and to document the obviousness of the presence or likely presence of a release or threatened release of any hazardous substance or petroleum product.

ES-2.0 PURPOSE

The purpose of this EBS is to describe the environmental condition of the property prior to divestiture "to ensure that the gaining owner is fully aware of the environmental conditions associated with the subject property and the ARNG is not held liable for any contaminations caused by activities that occur after the transfer takes place, and the property is no longer under ARNG control" (ARNG, 2011). This EBS:

- Establishes Due Diligence
- Assigns an ECOP Area Type
- Can be used to support Findings of Suitability to Transfer (FOSTs), Findings of Suitability to Lease (FOSLs) or uncontaminated property determinations, or a combination thereof, pursuant to the requirements of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), as amended by the Community Environmental Response Facilitation Act of 1992 (CERFA).

ES-3.0 SUMMARY

The Site is situated in an urban setting that is characterized by commercial businesses, agricultural land, undeveloped lots, and single-family residences.

The Site reconnaissance visit occurred on October 20, 2022, during which no stains, leaks or odors were observed. The main exterior features of the 15-acre Site are the lawn and concrete walkway that leads to the main entrance of the single-story slab-on-grade building, an asphalt parking lot, an outdoor storage shed, a cold storage building, a fenced motor pool area, a wood lot, and a surface drainage ditch. A burn pit and a partial steel tank were observed during the site reconnaissance.

The Beehunter Ditch is a surface drainage feature that flows in a southeasterly direction through the Site and is part of the greater Buck Creek sub-watershed. The ditch connects to the Site by three culverts located at the northern end of the property and drains surface runoff from surrounding agricultural land. There was no flow at the time of inspection, however, pooling water from previous weather-related events was visible. There were no sheens, odors, or staining in relation to the ditch.

The motor pool area is approximately 70'x90' and is surrounded by a six-foot security fence and locked gate. One 4'x6' concrete pad was located on the northern portion of the gravel lot. It was reported that the motor pool area was not used for vehicle maintenance activities or storage of materials and strictly used for temporary parking of transient vehicles. At the time of inspection,

there were no vehicles parked in the motor pool area. There were no leaks, stains, or odors observed.

The main interior features of the Site are office space, recreation space, kitchen, locker rooms, restrooms, storage/supply rooms, a vault, and maintenance/mechanical rooms. A storage area located on the eastern wall of the drill hall is the location of a former bullet backstop for small caliber pistols. It was reported floor/roof drains in the building are connected to City of Linton storm and sanitary sewer and there are no indications or records of wastewater treatment or disposal on Site.

There are no surface water bodies on the Site. The nearest surface water body is Buck Creek which is a tributary of the Black Creek Watershed and eventually flows into the White River approximately 7 miles south of the Site. The Site is located ¼ mile southwest of Buck Creek (EDR 2022a) and shallow groundwater flow is expected to flow between south and southwest towards the White River.

A review of the state and federal regulatory status of facilities located within a one-mile radius of the Site was conducted. The review indicated that:

- The Site is not listed on readily available ASTM Standard environmental databases.
- One Leaking UST site was identified within a 0.5-mile radius of the Site; the status of the site is deactivated (no confirmed release) and has been issued No Further Action letters by IDEM.

The listed facilities do not appear to pose a threat to the environmental conditions of the subject Site.

ES-4.0 CONCLUSIONS

Based on the information reviewed during the development and completion of this EBS, WSP has determined that the environmental condition of Site is Type 1, which is defined as a Site having "areas where no release or disposal of hazardous substances or petroleum products has occurred (including no migration from adjacent areas" (ARNG, 2011).

- A partial steel tank was observed on the eastern property line on the eastern bank of the Beehunter Ditch. However, at the time of inspection, there were no odors, staining, or other indications of a release relating to the tank. After discussions and observations with Mr. Braunlin, it was determined that the tank was located on the adjacent property and was not associated with the Site. Considering the location and condition of the partial tank and after observations of the surrounding area, there is no indication of environmental conditions relating to the Site.
- The burn pit, located on the southern edge of the wood lot, did not contain any stains, leaks, or odors relating to petroleum or other contaminants of concern. After discussion with INARNG staff, it was determined the pit was likely used for burning of landscape materials (leaf debris, sticks, etc.) and did not pose any environmental risks to the Site.

1.0 INTRODUCTION

This Environmental Baseline Survey (EBS) was prepared by WSP USA Environment & Infrastructure, Inc. (WSP) for the Indiana Army National Guard (INARNG) and the National Guard Bureau (NGB). This EBS was completed for the INARNG Linton Armory, a 15-acre parcel (hereinafter referred to as the "Site") located at 2000 Highway 54, Linton, Indiana. This EBS was performed in compliance with the ARNG Environmental Condition of Property (ECOP) Handbook and guidance from the American Society for Testing and Materials (ASTM) D6008-96: Standard Practice for Conducting Environmental Baseline Surveys to determine or discover and to document the obviousness of the presence or likely presence of a release or threatened release of any hazardous substance or petroleum product.

The purpose of this EBS is to describe the environmental condition of the property prior to divestiture "to ensure that the gaining owner is fully aware of the environmental conditions associated with the subject property and the ARNG is not held liable for any contaminations caused by activities that occur after the transfer takes place, and the property is no longer under ARNG control" (ARNG, 2011).

1.1 Property Name and Location

Property Name: INARNG Linton Armory

Address: 2000 Highway 54, Linton, Indiana 47441

Parcel Number: 28-06-13-000-031.000-17 Greene County, Indiana.

Township and Range: Southeast quarter of Section 13, T07N R7W, Stockton Township.

Coordinates: 39039195°N, -87.135959°W

Relative Location: Site is 90 miles southwest of Indianapolis

The location of the Site relative to the City of Linton boundary is shown on **Figure 1**. The legal description on record with the Greene County Recorder's Office is provided in **Appendix A**.

1.3 SCOPE OF SERVICES

The following tasks were performed:

- Performance of a Site reconnaissance for evidence of hazardous materials handling, storage, or disposal, and other potential contaminants or practices that may have affected the Site
- Evaluation of the surrounding properties with respect to their potential to impact the
 environmental integrity of the Site. This evaluation was limited to evidence of readily
 observable environmental concerns without accessing the neighboring properties, and
 information that was obtained from federal, state, and local regulatory agency files via
 use of an electronic database search supplied by Environmental Data Resources, Inc.
 (EDR)
- Review of reasonably available historical data (such as historical aerial photographs, historical topographic maps, Sanborn Fire Insurance Maps, and city directories), topographical and hydrogeological information, and other information, as appropriate, as provided by EDR
- Interviews with personnel knowledgeable of the Site and surrounding area.

1.4 ENVIRONMENTAL PROFESSIONALS CONDUCTING THE EBS

In accordance with the SOW, this EBS was performed, conducted, reviewed, and certified by Environmental Professionals (EPs), as defined in by 40 CFR 312.10 and the ARNG 2011 ECP handbook.

R. Scott Rought, CHMM, CP, Associate Project Manager

The EP responsible for reviewing Site information, and preparing and certifying this report is R. Scott Rought, CHMM. Mr. Rought holds a Master of Science degree from Oklahoma State University and a Bachelor of Science degree from Michigan State University, both in Environmental Science. He is a Certified Hazardous Materials Manager (CHMM), a Certified Underground Storage Tank Professional (CP) in the MDEQ's Part 213 UST program and holds certifications in asbestos, storm water, and hazardous waste operations.

Mr. Rought has more than 30 years of experience in the environmental field and has extensive experience in managing and performing Phase I and II ESAs, State of Michigan Baseline Environmental Assessments (BEAs), site characterizations, and Federal environmental assessments. Mr. Rought has conducted Phase I ESAs for properties ranging from agricultural to heavy industrial to federal installations. To assist the banking and real estate industry in keeping abreast of changes in the environmental community, Mr. Rought has presented informational seminars to these and other industries regarding the Federal All Appropriate Inquiry Rule and Due Diligence associated with commercial real estate transactions. He has also provided due diligence training for National Park Service staff.

Adam Weeks, Environmental Scientist

The EP who performed the Site visit is Adam Weeks. Mr. Weeks holds a Bachelor of Science degree in Environmental Studies and Geography from Western Michigan University, Kalamazoo, Michigan. He is a certified Construction and Industrial Storm Water Inspector in the State of Michigan. Mr. Weeks has more than 8 years of experience conducting and/or contributing to due diligence site characterizations and remedial investigations including: ASTM Phase I and Phase II site investigations; State of Michigan BEAs; field task leader for subsurface investigations in a variety of soil, rock, and groundwater conditions; and, site reconnaissance for Storm Water

Pollution Prevention Plans (SWPPPs), Spill Prevention Countermeasure and Control (SPCC) plans, Pollution Incident Prevention (PIP) plans.

1.5 ASSUMPTIONS AND LIMITATIONS

This EBS included a review of documents and the performance of interviews with individuals knowledgeable of the Site. WSP has assumed that the information provided during the interviews and in the documents is accurate, unless stated otherwise.

Our findings and opinions are relative to the date of our Site work and should not be relied on to represent conditions on other dates. These opinions are based on information obtained during the EBS and our experience. If additional information becomes available which might change our conclusions, we request the opportunity to review the information, reassess the potential concerns, and modify our opinions, if warranted.

Although this assessment has attempted to identify the potential for environmental impacts to the Site, potential sources of contamination may have escaped detection due to: (1) the limited scope of this assessment, (2) the inaccuracy of public records, (3) the presence of undetected or unreported environmental incidents, (4) inaccessible areas, and/or (5) deliberate concealment of detrimental information.

2.0 PROPERTY DESCRIPTION AND ENVIRONMENTAL SETTING

2.1 Property Description and Current Use

The Site has been owned and operated by the INARNG since 1957 when the property was purchased by the Department of Defense (Parcel No. 28-06-13-000-031.000-017). The one-story building (construction completed in 1958) is currently used as an office space by the INARNG, and as a community recreational space.

As indicated on **Figure 2**, the southern half of the 15-acre Site is characterized by a lawn and a concrete walkway that leads to the main entrance of the building, a motor pool area, a cold storage building, an outdoor storage shed, and an asphalt parking lot. The main entrance is located on the south side of the building. Secondary entrances/exits on the north and east side of the building consist of man doors and one overhead door. The layout of the building is shown on **Figure 3**.

2.2 SURROUNDING LAND USE

The Site is situated in and mixed commercial and urban setting and adjoined on the:

- North agricultural land that has recently been developed as a solar field.
- South by W State Road 54, beyond which is developed as commercial property and owned and operated by a restaurant and commercial businesses.
- East by a single-family residence, a wood lot and Beehunter Ditch.
- West by a First Baptist Church.

The general area beyond the properties described above is characterized by commercial establishments, agricultural land, and single-family residences.

2.3 TOPOGRAPHY

The elevation of the Site is approximately 506-feet above mean sea level and generally level (EDR, 2022b).

2.4 SITE GEOLOGY AND SOILS

The Site is situated in an urban setting and backfill is expected to characterize near surface subsoils of various underground structures within the city, such as municipal sewers, building basements, underground parking structures, etc.

The predominant soil type on the Site is Vigo silt loam, which is a somewhat poorly-drained soil with low permeability (EDR, 2022a). Surficial geology in the Site area is predominantly comprised of loam to sandy loam till of Jessup Formation, eastern source. Bedrock is located at a depth of greater than 60 inches (USGS, 1989).

2.5 SITE SURFACE WATER AND GROUNDWATER

There are no surface water bodies on the Site. Beehunter Ditch runs in a southeasterly direction through the Site and drains agricultural land surround the Site. Beehunter Ditch experiences seasonal and weather-related flows and did not contain surface flow during the Site reconnaissance. The nearest surface water body is Buck Creek, which is a tributary of Black Creek Watershed which flows into the White River. As indicated in Figure 1, the Site is located approximately 1 ¼ miles southwest of the Buck Creek (EDR 2022a). The White River flows in a southwesterly direction.

Monitoring wells are not located on the Site, and well records and static groundwater levels were not readily obtainable to accurately determine groundwater flow direction on the Site or in the immediate vicinity of the Site. Without empirical data of static groundwater measurements, groundwater flow direction cannot be confirmed or relied upon, however, it is reasonably expected that groundwater flow is generally to the south and likely fluctuates seasonally between southeast and southwest based on the following considerations:

- The portion of Buck Creek to 1 ¼ miles to the northeast flows in a south easterly direction;
 Beehunter Ditch, located 1 mile to the south flows in a southeasterly direction;
 Beehunter Ditch at the Site appears to flow in a southeasterly direction.
- The White River, that flows in a Southwesterly direction, is located 7-miles to the southeast.

2.6 Sensitive Environments and Natural/Cultural Resources

No sensitive environments or natural/cultural resources were identified during the development of this EBS.

2.7 OTHER RELEVANT ENVIRONMENTAL CONCERNS

Situated ¼ mile northwest of the Site is the location of former Black Creek Mine. The Black Creek Mine, owned by the Black Beauty Coal Company (NPDES Permit No. 0055301) operated as a surface coal mining facility. According to documents recovered from the IDEM Virtual File Cabinet, mining operations at the Black Creek Mine were completed and a voidance of the NPDES permit was issued on August 16, 1999. No violations of discharge were reported for the Black Creek Mine during its operations (IDEM VFC).

IDEM developed a Total Maximum Daily Load (TMDL) report for the Black Creek watershed for identifying and analyzing pollutants. The Buck Creek sub-watershed, which encompasses the Site, drains approximately 35 square miles in the northeast portion of the Black Creek Watershed. There are no records of environmental sampling conducted in Buck Creek, Beehunter Ditch, or any other areas relating to the Site (Buck Creek Watershed TMDL Project).

3.0 RECORDS REVIEW AND INTERVIEWS

3.1 RECORDS REVIEW

WSP reviewed available documentation and conducted interviews to obtain information pertinent to the use and environmental condition of the Site, adjoining properties, and regulatory environmental concerns less than one mile from the Site.

Prior to the development of this EBS, no reports regarding past history of the Site were provided to WSP for review.

3.1.1 Historical City Directories

WSP subcontracted Environmental Data Resources, Inc. (EDR) to provide city directories for the Site and addresses on 2000 Highway 54. As indicated in the EDR City Directory Report provided in **Appendix C**, city directories were available for eighteen years: 1992, 1995, 2000, 2005, 2010, 2014 and 2017 (EDR, 2022e). A summary of the records review is listed below.

Subject Site, 2000 Highway 54

2005, Army National Guard

North adjoining property

Not provided.

South adjoining property, 1983 & 2033 Highway 54

2014 through 2017, Goose Pond Pizza 2014 through 2017, Crane Federal Credit Union

East adjoining property, Highway 54

Not provided.

West adjoining property, 1950 Highway 54

2010, First Baptist Church 2014, First Baptist Church 2017, Linton First Baptist Church

A review of listings for properties in the vicinity of the Site with addresses on Highway 54 identified only commercial and residential properties, none of which indicate a potential environmental risk to the Site.

3.1.2 Sanborn Fire Insurance Maps

WSP subcontracted EDR to provide Sanborn maps relevant to the Site. As indicated in the EDR Certified Sanborn Map Report provided in **Appendix C**, fire insurance maps covering the Site were not found.

3.1.3 Historical Aerial Photographs

WSP subcontracted EDR to provide historical aerial photographs relevant to the Site. As indicated in the EDR Aerial Photo Decade Package provided in **Appendix C**, aerial photographs were available for ten years: 1952, 1962, 1973, 1977, 1986, 1989, 1998, 2005, 2012, and 2016 (EDR,2022d). A summary of the records review is listed below.

Subject Site

- The 1952 photographs depict the land as agricultural.
- The drainage ditch appears in all site photographs.
- The Linton Armory is shown on all aerial photographs after 1952.
- Between 1986 and 1989, an ancillary building appears north of the main building, which is likely the cold storage building that can be seen on **Figure 3**.
- The construction of the power station can be seen in the 1998 through 2016 photographs.

Immediately North of the Site

- The adjoining property to the north of the site appears as agricultural land in all photos dating back to 1952.
- The Beehunter drainage ditch that runs through the Site property appears in all photos from 1952 through 2016. The direction of flow appears to be north to south and remains the same throughout all photos, however, due to active farming activities on the property, the surface flow routes differ from year to year.

Immediately East of the Site

- The adjoining property to the East appears as agricultural land in the 1952 & 1962 photographs.
- A residential structure and associated driveway appear in the 1973 photographs.
- In 1986, the adjacent land to the east appears to no longer be utilized for agricultural purposes and a wood lot is visible on the northern portion of the property from 1986 through 2016.

Immediately West of the Site

- The adjacent property to the west appears as agricultural land from 1952 through 1989.
- In 1998, the church building as well as an electrical drop station appear constructed and remain unchanged through 2016.

Immediately West of the Site

- The adjacent properties to the south appear as mixed residential and agricultural from 1952 through 1998.
- In 2005 commercial buildings are constructed and remain relatively unchanged through 2016.

3.1.4 Historical Topographic Maps

WSP subcontracted EDR to provide historical topographic maps relevant to the Site. As indicated in the EDR Historical Topo Map Report provided in **Appendix C**, topographical maps were available for 10 years: 1938, 1939/1940, 1947, 1950, 1963, 1977/1980, 1986, 2013, 2016 and 2019 (EDR,2022b). A summary of the records review is listed below:

- The topography in the vicinity of the Site is unchanged on all nine maps.
- The 1938 through 1950 photographs depict a strip mine located 0.25-miles northwest of the site.
- Structures depicted on the 1963 through 1986 maps include the Linton Armory, structures to the north, east and west of the Site appear to be residential.
- Structures are not depicted on the topographic maps dated 2013 through 2019.

3.2 INTERVIEWS

3.2.1 Interview with Linton Amory Building Services Worker

WSP Interviewed Mr. Todd Felt, the Linton Armory Building Services Worker (BSW) on October 20, 2022. Mr. Felt has been employed as the BSW for approximately six months and currently oversees general building maintenance and housekeeping duties. Mr. Felt indicated:

- He was not aware of any spills, leaks, or environmental concerns on the Site during his six months as the Site BSW.
- Prior building uses include dry storage of goods and equipment and use as a general training and educational facility.
- The former drill hall in the building is often rented for graduation parties and other small private events.

3.2.2 Interview with Representative of INARNG

WSP Interviewed Robert Braunlin, CHMM, Deputy Chief of Compliance for INARNG on October 20, 2022. Mr. Braunlin indicated he has limited knowledge of the Linton Armory but that he had completed a search of archived Site records at the NGB Headquarters in Indianapolis. Mr. Braunlin indicated that it was likely that the heating system for the building previously utilized fuel oil, however, no records of heating oil or coal storage were recovered during a search of facility records.

3.2.3 Interview with Greene County Health Department

WSP interviewed Ms. Shari Lewis, Health Administrator, of the Green County Health Department on October 20, 2022. Ms. Lewis indicated that there are no environmental records regarding the Site on file with the Greene County Health Department.

3.2.4 Interview with City of Linton

WSP interviewed Mr. Gary Tannehill, IT manager, at the City of Linton. Mr. Tannehill indicated that the Site building was connected to municipal storm and sewer systems provided by the City. A map showing utilities surrounding the site was received on October 24, 2022. Although the map of utilities shows storm, sanitary, and water mains, no lateral connections to the building were visible.

3.2.5 Interview with Linton Fire Department

An attempt to interview the Linton Fire Department was made on October 20, 2022. There was no personnel at the station at the time of visitation. An attempt to complete a phone interview was completed on October 26, 2022. After reasonable attempts to contact the department, WSP has not received any additional information.

3.3 ANALYSIS OF FEDERAL AND STATE REGULATORY RECORDS SEARCH RESULTS

WSP subcontracted EDR to provide available and pertinent information from state and federal databases on properties within the vicinity of the Site that:

- Are known to be contaminated or exhibit the potential for contamination due to the generation or handling of toxic or hazardous materials
- May pose potential environmental concerns to the Site property

As indicated in the EDR Radius Map Report with Geocheck provided in **Appendix D**, the information reported is limited and only includes sites known to the regulatory agencies at the time of publication (EDR, 2022a). The databases and corresponding minimum search distances from the Site are listed below:

- The databases that were searched to determine whether the Site is listed are:
 - AUL database that lists sites with institutional or engineering controls
 - Emergency Response Notification System (ERNS) list, that documents reported uncontrolled releases of oil and hazardous substances
- The databases that were searched to determine whether the Site and/or adjoining properties are listed are:
 - Resource Conservation and Recovery Act (RCRA) database that tracks the movement of hazardous waste in several categories
 - Large Quantity Generator (LQG)
 - Small Quantity Generator (SQG)
 - Conditionally Exempt SQG (CESQG)
 - Registered storage tank databases that track USTs and aboveground tanks
- The databases that were searched to identify sites within a one-half mile radius of the Site are:
 - Landfills and disposal sites
 - Leaking Underground Storage Tank (LUST) sites
 - Voluntary cleanup sites
 - Brownfield sites
 - Federal National Priority List Deletions (Delisted NPL)
 - Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS), and the state/tribal equivalent
 - Federal CERCLIS list of sites at which no further remedial action is planned (NFRAP)
 - RCRA TSDF at which corrective action activities are not taking place (non-CORRACTS)
 - Treatment, Storage, and Disposal Facility (TSDF)
- The databases that were searched to identify sites within a one-mile radius of the Site are:
 - Federal National Priorities List (NPL)
 - State or Tribal Hazardous Waste Sites (SHWS)
 - Sites at which hazardous waste is handled with corrective action activities (RCRA CORRACTS)

The results of the databases search are summarized in **Table 1**. The table indicates the regulatory status of each site, as well as the distance and orientation (upgradient, downgradient, crossgradient) of the site relative to the location of the subject Site property.

- Sites upgradient of the Site have the potential for impacting the Site because upgradient groundwater is expected to flow towards the Site
- Sites downgradient of the Site have little potential for impacting the Site because downgradient groundwater is expected to flow toward the Mississinewa River and away from the Site

 Sites cross-gradient of the Site likely have little potential for impacting the Site because cross-gradient groundwater is expected to flow in the same direction or generally parallel to Site groundwater

As indicated in Section 2.5, for the purposes of this EBS, Site groundwater is expected to flow between South and Southeast through the Buck Creek Watershed.

• Properties south of the Site are considered to be downgradient of the Site.

Table 1.
Summary of Regulatory Database Search (1)

Database Listing	Search Radii (Miles)	No. of Sites	Name and Site Location	Distance (Miles) / Direction from Site / Gradient	Regulatory Status
Federal NPL	0.5	0	N/A	N/A	N/A
Federal NPL (delisted)	0.5	0	N/A	N/A	N/A
Federal TSD Facilities	0.5	0	N/A	N/A	N/A
Federal CERCLIS	0.5	0	N/A	N/A	N/A
Federal CERCLIS NFRAP	0.5	0	N/A	N/A	N/A

⁽¹⁾ The information in Table 1 has not been confirmed by field reconnaissance or further records searches. Sites that were identified by EDR but later determined by WSP not to be located within applicable ASTM search radii are not included in Table 1. Sites listed as "unmappable" in the search report were evaluated by WSP are included in Table 1 if the site was identified within search radii.

3.3.1 Review of Regulatory Records Reasonably Available for the Site

As indicated in Table 1, the Site was not listed in ASTM Standard databases presented in the EDR Report.

NA: Not available or not applicable.

3.3.2 Review of Regulatory Records Reasonably Available for Off-Site Properties

Sites listed in Table 1 that have a No Further Action letter issued by the regulatory agency and sites that have been deactivated, discontinued.

Sites that are State and Tribal Solid Waste Disposal Facilities are described below.

Wal-Mart Supercenter

No violations found

Advanced Auto Parts

No violations found

3.3.3 Orphan and Unmapped Sites

WSP reviewed EDR's list of unmappable sites to determine if they are located within the applicable ASTM Standard search radii. No orphan or unmapped sites were identified on EDR's lists of additional environmental records.

3.3.4 Additional Environmental Record Sources

The EDR Report also contains a review of environmental databases that are not included in the ASTM Standard. These lists were reviewed to determine whether the Site is listed on one of these environmental databases. The Site was not identified on EDR's lists of additional environmental records.

4.0 SITE RECONNAISSANCE

Mr. Adam Weeks of WSP conducted a reconnaissance of the Site and surrounding area on October 20, 2022. Mr. Weeks was accompanied by Robert Braunlin (INARNG, Deputy Chief, Compliance), Sonny Hall (Physical Plant Director), and Todd Felt (BSW) during the Site visit.

4.1 METHODOLOGY AND LIMITING CONDITIONS

The reconnaissance included a walkthrough of all accessible areas of the Site to identify evidence of the presence of contamination or other environmental concerns. Weather conditions during the Site visit consisted of partly cloudy skies with temperatures in the 50s (degrees Fahrenheit).

4.2 SITE OBSERVATIONS

Photographs taken during the Site reconnaissance are provided in **Appendix E**. Major Site features are summarized in **Table 2**. Affirmative responses are designated by "Yes" in the far right column, and negative responses are left blank.

Table 2.
Summary of Major Site Features Observed, October 20, 2022

Category	Item or Feature	Observed
	Aboveground storage tanks (ASTs)	
Underground and Aboveground	Drums, barrels and/or containers	Yes
Chemical or Waste Storage	Underground storage tanks (USTs) or ancillary UST equipment	
Olorage	Pipeline markers	
Electrical	Pad-mounted transformers	
Transformers/ Polychlorinated Biphenyls (PCBs)	Pole-mounted transformers and/or capacitors	Yes
	Stressed vegetation	
	Stained soil	
	Stained pavement or similar surface	
	Trash debris and/or other waste materials	
	Dumping or disposal areas	
	Construction/demolition debris and/or dumped fill dirt	
Releases or Potential Releases	Surface water discoloration, odor, sheen, and/or free floating product	
	Strong, pungent or noxious odors	
	Exterior pipe discharges and/or other effluent discharges	Yes
	Used tires	
	Burned structures	
	Abandoned vehicles	
	Pits/ponds/lagoons	
Other Netchle C'	Munitions and Explosives	
Other Notable Site Features	Surface water bodies	
i catares	Quarries or pits	

Category	Item or Feature	Observed
	Wells (Potable Water Well)	
	Fill material	
	Other – Burn Pit, Ditch	Yes

Southern Portion of Property

The southern portion of the Site is characterized by one single story slab-on-grade building, a cold storage building, one storage shed, a fenced motor pool area, and various asphalt parking areas. The main entrance located on the south side of the building access. The secondary entrance/exits on the north side of the building access.

The storage shed is located on the north side of the Site building and is used to store landscaping items (lawn mower, string trimmer, etc.) and household quantities of oil and gas for maintaining equipment. No stains, leaks or odors were present at the time of the inspection.

The fenced motor pool area measured approximately 70'x90' and is comprised of a flat gravel grade and a 6-foot security fence. No vehicles, machinery, or materials were stored in the lot at the time of inspection. An 8'x4' concrete pad was visible in the northwest corner of the motor pool area, building staff was unsure of any purpose of the concrete pad during the inspection. It was reported that the motor pool area was not used for maintenance or storage of POL and was utilized as temporary storage of vehicles during transient activities.

The building's interior is comprised of a gymnasium (drill hall), kitchen, locker rooms, a vault, utility rooms, restrooms, storage/supply rooms, and office space. All rooms/areas of the building were accessible during the Site reconnaissance in exception of the vault room, which has restricted access to unauthorized personnel. The building is currently being occupied as office space for the INARNG and is used on occasion for rented space for graduation parties and other private events.

The drill hall was once used as an indoor shooting range for small caliber pistols with the storage room as the former backstop and bullet sand trap. The range was closed in 2016 and is currently used as storage space for tables, chairs, and other furniture used for events. Following the range closure, it was reported that the area was cleaned and coated using Fiberlock Lead Barrier Compound or approved equal encapsulating paint. No drains were located on the floor of the backstop area and there is no evidence of lead or other materials associated with range activities.

Mr. Felt (BSW) indicated the building is connected to the City of Linton municipal storm, sanitary sewer and water. It was reported that all floor and roof drains associated with the building drain into municipal storm and sanitary systems. There are no records of a septic system and/or water treatment system associated with the site.

The source of heat for the building is a natural gas boiler system and floor/celling mounted radiators. Mr. Braunlin indicated that the boiler is believed to have been fueled by fuel oil, however, there are no records that indicate fuel storage at the site.

Northern Portion of Property

The northern portion of the site consists of a wood lot, Beehunter Ditch, three corrugated culvert pipes, a burn pit, and a partial steel tank. Two culvert pipes are located at the northwestern corner

of the building, the third being located at the northern central portion of the site. All three culvert drains transport stormwater from adjacent properties into Beehunter Ditch that spans the entirety of the site. The drain flows in a southeasterly direction through the property and empties under Highway 54 on the southeast corner of the Site. Although there was no flow during the time of inspection, pooling of stormwater was observed in various areas throughout the ditch.

Near the eastern edge of the property line, portions of a steel tank were observed. It was unclear at the time of inspection if the tank was located on the adjacent or Site property. However, no odors or staining were visible around the tank at the time of inspection.

An area suspected to be a burn pit was located on the southern edge of the wood lot. The pit contained charred wood and concrete debris. The origin of the pit was unclear to staff at the time of inspection. No stains or odors were associated with the pit at the time of inspection.

4.3 OTHER ENVIRONMENTAL/SPECIAL CONTAMINATION CONCERNS

WSP reviewed available Site records to obtain information about other environmental/special contamination concerns including lead-based paint (LBP), asbestos-containing materials (ACM), radiological materials, and munitions and explosives. The results of the records review are summarized below:

- An ACM inspection was conducted by DLZ of Lansing, Michigan on September 3, 2020.
 As indicated by the report provided by DLZ, the Linton Armory building contains ACM. A copy of the report is on file with INARNG.
- An LBP inspection was conducted by DLZ of Lansing, Michigan on September 3, 2020.
 As indicated by the report provided by DLZ, the Linton Armory building contains LBP. A copy of the report is on file with INARNG.
- A Hazard Management Plan dated February 2021 was developed for INARNG by DLZ of Lansing, Michigan. The plan describes procedures for preventative maintenance, surveillance, and general housekeeping to prevent exposure to building tenants, occupants, maintenance workers, and contractors.
- There is no anecdotal or physical evidence that munitions were disposed or improperly
 used at the Site. Historical records searches did not indicate that any demolition
 activities, disposal activities, or training exercises involving explosives or munitions were
 conducted at the Site.
- WSP conducted an on-site visual inspection to identify transformers, capacitors, hydraulic lifts, or other electrical equipment likely to contain polychlorinated biphenyls (PCBs). One pole-mounted transformer was located on site, there were no labels, marks, or documentation indicating the transformer contained PCB materials. Due to the age of the building, it must be assumed that PCB containing materials or ballasts may be encountered.
- No radiological equipment or related materials, or materials containing perfluoroalkyl and polyfluoroalkyl substances (i.e., fire retardants, AFFF, etc.) have reportedly been used or stored on the Site.
- There is potential that chemicals, such as pesticides, herbicides, and fertilizers, were
 used on site. The types and application frequency are unknown, however, proper
 application and general of these chemicals does not constitute an environmental
 concern and therefore does not pose a significant risk to the Site.
- Neither Mr. Felt nor Mr. Braunlin were aware of any radon gas testing performed at the Site. The EDR report identifies that a minimum of 5 radon tests have been conducted in

t k	the Site area. The average radon concent below the EPA recommended action level	tration for these tests was 0.780 pCi/L which is I of 4 pCi/L.

5.0 CONCLUSIONS

5.1 ENVIRONMENTAL CONDITION OF PROPERTY

Based on the information reviewed during the development and completion of this EBS, WSP has determined that the environmental condition of Site is Type 1, which is defined as a Site having "areas where no release or disposal of hazardous substances or petroleum products has occurred (including no migration from adjacent areas" (ARNG, 2011).

- A partial steel tank was observed on the eastern property line on the eastern bank of the Beehunter Ditch. However, at the time of inspection, there were no odors, staining, or other indications of a release relating to the tank. After discussions and observations with Mr. Braunlin, it was determined that the tank was located on the adjacent property and was not associated with the Site. Considering the location and condition of the partial tank and after observations of the surrounding area, there is no indication of environmental conditions relating to the Site. The approximate location of the tank can be seen on **Figure 2 & Figure 4**.
- The burn pit, located on the southern edge of the wood lot, did not contain any stains, leaks, or odors relating to petroleum or other contaminants of concern. After discussion with INARNG staff, it was determined the pit was likely used for burning of landscape materials (leaf debris, sticks, etc.) and did not pose any environmental risks to the Site. The approximate location of the pit can be seen on **Figure 2 & Figure 4**.

Figure 4. ECOP Area Type Map

5.2 Known or Suspected Areas with Transfer Restrictions					
Based on current information, no transfer/use limitations for the Site may be necessary.					

6.0 ENVIRONMENTAL PROFESSIONAL STATEMENT

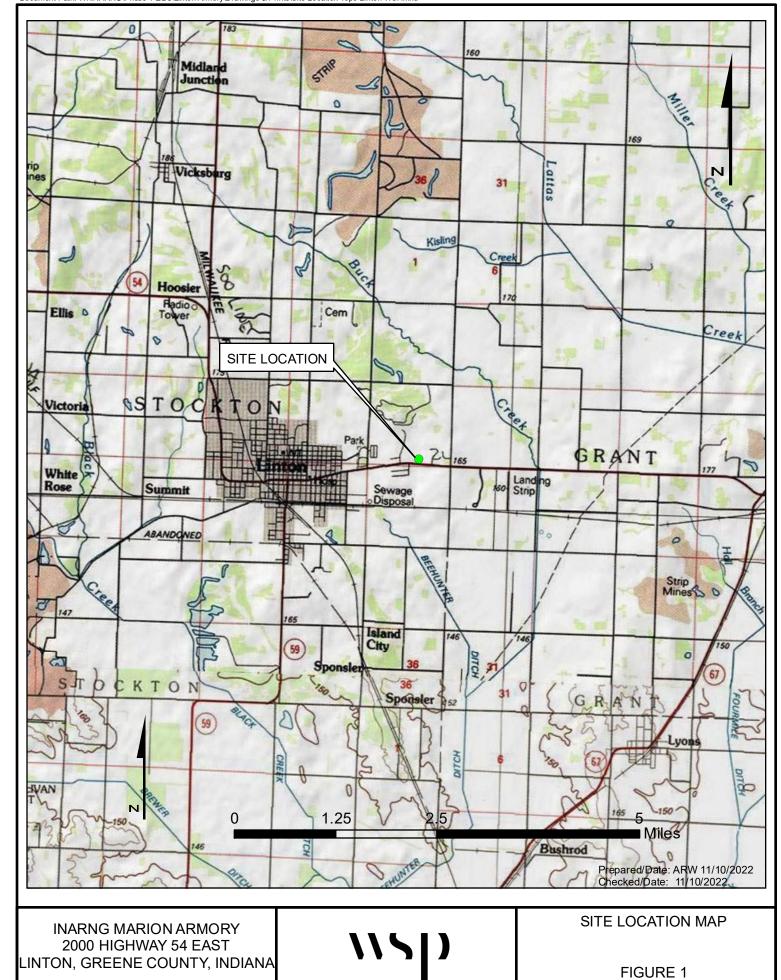

I declare that, to the best of my professional knowledge and belief, I meet the definition of "Environmental Professional" as defined in § 312.10 of 40 Code of Federal Regulations (CFR) Part 312.

I have the specific qualifications, based on education, training, and experience, to assess a property of the nature, history, and setting of the subject property.

I have developed and performed all of the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Brad street. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

RESEARCH SUMMARY

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by WSP USA Environment & Infrastructure Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by WSP USA Environment & Infrastructure Inc. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
GENERAL ELECTRIC CO	12TH ST SE	WSW 1/2 - 1 (0.912 mi.)	7	26

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/20/2022 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WALMART SUPERCENTER	2251 E STATE HWY 54	SE 1/8 - 1/4 (0.150 mi.)	A2	8
EPA ID:: INR000002626				

Lists of state and tribal leaking storage tanks

LUST: Lust List.

A review of the LUST list, as provided by EDR, and dated 08/02/2022 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page	
MURPHY USA 6586	2261 E HWY 54	ESE 1/8 - 1/4 (0.196 mi.)	5	24	
Facility Id: 24419					

Description: Deactivated (no release confirmed)

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Management's Indiana Registered Underground Storage Tanks list.

A review of the UST list, as provided by EDR, and dated 08/02/2022 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page	
MURPHY USA 6586 Tank Status: Currently in use	2261 E HWY 54	ESE 1/8 - 1/4 (0.196 mi.)	5	24	
Facility Id: 24419					

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Landfill / Solid Waste Disposal Sites

SWRCY: A listing of recycling facilities located in the state of Indiana.

A review of the SWRCY list, as provided by EDR, and dated 01/21/2022 has revealed that there are 3 SWRCY sites within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
WAL-MART	2251 E. IN 54	SE 1/8 - 1/4 (0.150 mi.)	A1	8

Waste Code: F001

Waste Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING:

TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED

FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE

SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003

Waste Description: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL

ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT

MIXTURES.

Waste Code: F006

Waste Description: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT

FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM

PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF

ALUMINUM.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date: 2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

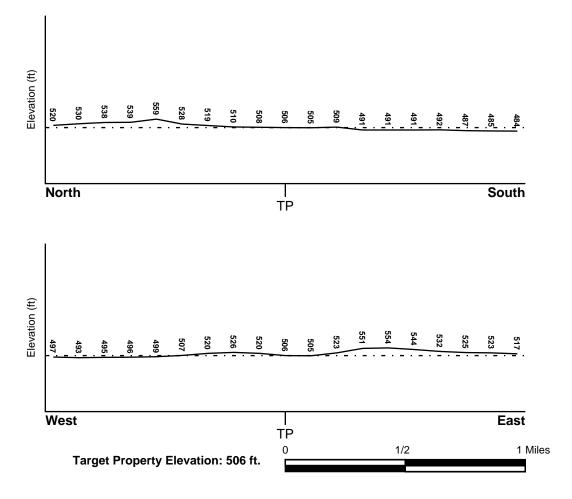

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property FEMA Source Type

18055C0165C FEMA FIRM Flood data 18055C0144C FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

LINTON YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Paleozoic Category: Stratifed Sequence

System: Pennsylvanian

Series: Atokan and Morrowan Series

Code: PP1 (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: VIGO

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic

conductivity, wet state high in profile, etc. Depth to water table is

1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	8 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 7.30 Min: 4.50
2	8 inches	20 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 5.50 Min: 4.50
3	20 inches	50 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.06 Min: 0.00	Max: 6.00 Min: 4.50
4	50 inches	90 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 0.06 Min: 0.00	Max: 7.30 Min: 5.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: shaly - silt loam

loam

Surficial Soil Types: shaly - silt loam

loam

Shallow Soil Types: silty clay loam

clay loam

Deeper Soil Types: loam

shaly - clay loam

silt loam sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: US Fish & Wildlife Service

Telephone: 703-358-2171

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
